

Aftercare Advice for your Pop Top Roof

- If you have either the gel white or gel black roof these are subject to UV damage over time, to prolong the life and bring back the shine you will need to machine polish the roof using a Faredla 63 Compound Premium and you will want to apply this annually.
- If your roof is painted, wash and maintain as you would the rest of the van. If you are lucky enough for a bird to poo on the roof, wash off as quickly as possible!
- Avoid drive - through Car washes.
- Wash Canvas with soapy water and allow to dry thoroughly before closing the roof.
- If roof is put down when the canvas is wet, reopen to dry out as soon as possible.
- Apply waterproofing spray on seams and zips (inside and out). You should do this when you return home after collecting your van, and annually after this.
- When opening and closing a scenic canvas, pull the roof down slightly to take the tension out.
- Operate the struts every month so they self-lubricate.
- Lubricate hinges annually, with a silicone-based lubricant. Take extra care to avoid the canvas, so that it doesn't mark.
